

Fair Oaks Avenue Street Improvement Project

Before
After

Project Description:

This project consists of a series of small projects designed to improve pedestrian safety and movement along Fair Oaks Avenue.

The improvements include the installation of pedestrian bulb-outs and stamped concrete crosswalks at key intersections for pedestrian safety, and landscaped medians along Fair Oaks (between Columbia Street and Monterey Road).

In addition, a left-turn lane will be added to the existing lane on Huntington Drive for turns onto northbound Fair Oaks Avenue.
